

↑ RIGGING PLATE 1/3

Aluminum alloy rigging plate helps to organize carabiners at the anchor point. Efficient force distribution at different load directions.

DESCRIPTION

Rounded profile allows ropes and webbings to be connected directly to the plate

All attachment points are big enough to allow locking sleeves of most carabiners passing through

Central attachment point can accommodate up to three carabiners

Black anodized aluminum alloy, 6 mm thick, CNC machined

KEY FEATURES

- Rounded profile
- Big central attachment point
- Strength 36 kN

STANDARDS

CE 1019

FEATURES

36 kN

65 g / 2,3 oz

unique number

warranty

MATERIAL COMPOSITION

- 100% aluminum alloy

TECHNICAL DATA

production batch MMY (month, year)

unique serial number XXXX

MAINTENANCE

Lifetime of the product is not strictly limited by the manufacturer. Depending on the condition of the product and its history it may be necessary to retire it immediately.

beware of salt
